Rotas iGTi

 Vimos anteriormente um exemplo simples de criação de rota, a partir de uma instância do Express

```
import express from "express";

const app = express();

app.get("/", (req, res) => {
    res.send("Hello World!");
});

app.listen(3000, () => {
    console.log("API Started!");
});
```

 Veremos outras opções possíveis para configuração de rotas com o Express
